Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant's attorney, Christopher Eusebi, contacted the Patent Office to discuss the independent claim amendments prior to a first action after RCE. Each independent claim was discussed with the main theme being that the functional language was insufficient to overcome the prior art rejections, but that either adding an additional element (i.e. the driver to the implant and fastener) was a start, and that when the fastener was stated as being a staple, that the broadest interpretation precluded the use of the plugs of Kohrs. Claims 21, 25, and 26 were discussed for the continued 35 U.S.C. 112, second paragraph issues and Mr. Eusebi said that such would be corrected. Claim 32 was stated as appearing to be allowed over the two previous pieces of art. In general, applicant was mostly informed how the independent claims would still be rejected with recommendations for overcoming the references.
